AND DILIGENCE

RT-BC AREA SAFETY ORIENTATION - VISITOR ONLY

RioTinto

Description

This E-Learning training session is required in order to access the Rio Tinto BC Operations site.

This course presents the different areas of the Kitimat plant and general safety measures to apply while working on the plant.

Target audience

This course is mandatory for all / only employees who will access one of these sites ASO - Power, ASO - Casting, ASO - Carbon South, ASO-Carbon North, and ASO- Wharf.

Objectives

- Identify the key areas within the Kitimat plant
- Identify the plant-specific Personal protective equipment (PPE)
- Explain how to deal with the critical risks
- List the PPE rules followed at the plant

Pre-requisite

None.

Some Area Specific Orientation (ASO) courses or other courses may be required depending on the specific work site and nature of work.

Please refer to your RT-BC project manager to validate which course will be necessary for your nature of work.

Registration and payment

This session is free.

Cognibox members must register through Cognibox.

Pedagogical Approach

Interactive e-learning presentation.

Evaluation

Built-in exam.

A certificate may be downloaded and printed from the Cognibox E-learning Platform.

Once the course is completed (success), the information will be saved in Cognibox, and will be accessible to authorized RioTinto Personnel for consultation.

Duration

15 Minutes.

The duration of the training is a general indication, and may vary significantly from one person to another.
