

Kidd Operations

Located in Timmins, Ontario, we operate the Kidd Concentrator and the Kidd Mine, the world's deepest base-metal mine below sea level, mining at 9600 feet with shaft bottom at 9889 feet.

To meet the challenges of deep mining, we employ a highly skilled workforce and use leading edge technology like automated loaders and ventilation-on-demand. With a constant focus on achieving zero harm, we are committed first and foremost to safety, the development of our people, and the sustainability of our community and environment.
