

PERFORMANCE  
AND DILIGENCE

# **IOC-RAILWAY SAFETY AWARENESS**

## **Description**

This rail safety group procedure, which is linked to the C-3 standard (vehicles/driving), was developed to manage hazards associated with the operation and the maintenance of infrastructure and rail vehicles.

This presentation will explain the contents of the standard and what you need to know as an employee or contractor.

## **Target Audience**

Railway premises safety awareness is mandatory for all persons on IOC / QNS&L property.

## **Objectives**

After this training, you will be qualified / authorized to be in the danger zone (yellow) and cross the line of fire (red) while staying 9 meters from the end of all stationary rail vehicle.
