

PERFORMANCE
AND DILIGENCE

Development of Business Competitiveness

Mandate

To develop business competitiveness in the context of continuous improvement by focusing on [supply chain](#), development of [management](#) skills, adoption of new technologies, marketing, start-up [or go-to-market] and [project management](#).

Solutions implemented

The objectives were to develop stakeholders' management skills and to act as mentor to the company's senior management.

To ensure that the strategies adopted during an earlier project were monitored, to implement work methods and inventory management, production planning and, beyond that, to continue establishing costs, budget and estimates, we met with the company leaders one day per month over the course of a year.
