

PERFORMANCE  
AND DILIGENCE

# Health Safety and Security Management Software

There are numerous OHS challenges, and each unforeseen event entails significant costs for companies. [Cognibox](#) is the online solution (SAAS).

More than “just” a reduction in health and safety red tape for large contractors and the subcontractors who do business with them, [Cognibox](#) is synonymous with fewer accidents and due diligence, performance monitoring and positioning in relation to industry leaders. [Cognibox](#) is a powerful agent for continuous OHS improvement.

## Cognibox and OHS

### Qualification of companies

Cognibox enables you to present a clear picture of OHS practices and performance, organized according to the requirements of each major contractor.

The result is the ability, through indicators and integrated feedback systems, to:

- Properly monitor performance
- Target improvement priorities in terms of clients and OHS best practices
- Benchmark yourself in relation to industry leaders

### Health and safety training

Cognibox can:

- Monitor [OHS training](#) requirements for clients and communicate these to them
- Ensure that employee records are consistent, complete, clear and up to date, all certified by a recognized third party
- Demonstrate due diligence in OHS

### Work management

Cognibox enables you to:

- Identify and clearly communicate all OHS requirements applicable to a job, a contract, a work site—well before the work is done
- Make informed plans for project execution and prepare your team in accordance with the applicable requirements: training, PPE, permits, appropriate procedures, etc.
- Perform on site monitoring of compliance with OHS requirements

The ultimate goal is to contribute to the creation of safe, accident-free workplaces.
