

PERFORMANCE
AND DILIGENCE

Hot Work

Description

Complete training on techniques for work that requires use of an open flame or that is likely to be a source of ignition.

Note: The complete version of this training course will always be given, regardless of the title, which may be Full or Review.

Target audience

Anyone who has to perform work involving welding or fire hazards.

Objectives

- Learn how to work safely when there are fire hazards;
- Use proper equipment in a hot work situation;
- Know the work procedures and regulatory requirements regarding hot work.

Course content

- Duties and responsibilities;
- Fire prevention;
- Types of protection;
- Managing systems, records, permits and various forms.

Educational approach

Presentations, class participation.

Evaluation

An exam is used to assess knowledge.

Duration

2 hours.

The duration of the training can differ according to your needs when it is given in private enterprise.
