Secure Online Shopping

Online purchase and secure SSL transmission

Online purchase on the SIM website is done in a fully secure environment.

SIM works in partnership with Bambora to ensure the complete confidentiality and security of the information you transmit. Information about you and your credit card is sent in the form of an electronic message that has been encrypted and encrypted to ensure the confidentiality of the information contained therein. As a result, this message cannot be intercepted, altered, or decoded by an intermediary.

SIM encounters secure SSL transmission standards, which means that your transaction will always be safely routed.

SIM does not keep any data from any transaction regarding credit information. That's why you have to resubmit your credit information in each new transaction.
